

**EOL Resistor Diode Assembly for Releasing Circuit - Stock Number 3005012**

**Features**

- Connect the EOL Diode Resistor Assembly as required at remote locations for supervision of releasing circuit solenoids and electric actuators.
- Resistor Value – 5.1K Ohm / 5% Tolerance.
- Refer to panel installation manuals for additional details

**Specifications**

Overall Length	12 inches
Wire Type and Gauge	#18 AWG Stranded Red and Black Jacketed
Resistor Value	5.1K $\Omega$ , 1/4 W
Diode Value	6A1, 100V, 6A

**EOL Resistor with 6" Wire Leads - Stock Number 3005013**

**Features**

- Connect the EOL Resistor Assembly as required at remote locations for supervision of Class B IDC & NAC Circuits
- Resistor Value – 5.1K Ohm / 5% Tolerance.
- Refer to panel installation manuals for additional details

**Specifications**

Overall Length	6 inches
Wire Type and Gauge	#18 AWG Stranded Black, Jacketed
Resistor Value	5.1K $\Omega$ , 1/2 W
